                                                                                                                                                                                        FUNCTION: MEDIATES BOTH INFLOX AND EFFLUX OF NUCLEOSIDES ACROSS THE MEMBRANE (EQUILIBRATIVE TRANSPORTER). IT IS INSENSITIVE (EI) TO LOW CONCENTRATIONS OF THE INHIBITOR NITROBENZYLMERCAPTOPURINE RIBOSIDE (NBMPR) AND IS SODIUM-INDEPENDENT. SPECIFIC FOR NUCLEOSIDES, BUT MAY ALSO TRANSPORT HYPOXANTHINE. MAY ALSO PLAY A ROLE IN THE EFFLUX OF INOSINE AND HYPOXANTHINE FROM MUSCLE CELLS DURING THE NET DEGRADATION OF PURINE NUCLEOTIDES THAT OCCURS DURING STRENHOUS EXERCISE AND/OR IN THE REUPTAKE OF THESE PURINES DURING THE RECOVERY PROCESS (BY SIMILARITY).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   70 MGSLTIGSQLPNASINVFNLFLIIAGPLIYRVFAPVCFNIVNLTIILLLVIVLEPTEDSM 129

Special Protein Ar4905130 [imported] - Arabidopsis thaliana
C) Special Arabidopsis thaliana (mouse-ear cress)
C) Special Arabidopsis thaliana (mouse-ear cress)
C) Accession: E85064

R; anonymous, The European Union Arabidopsis Genome Sequencing Consortium, The Cold Sprin Nature 402, 769-777, 1999
A; Title: Sequence and analysis of chromosome 4 of the plant Arabidopsis thaliana.
A; Accession: E85064
A; Accession: E85064
A; Accession: E85064
A; Astatus: preliminary
A; Molecule type: DNA
A; Residues: 1-418 <ATO>
C; Genetics: 1-418 <ATO>
A; Cross-references: GB:NC_001268; NID:97267272; PIDN:CAB81055.1; GSPDB:GN00140

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 4, Sequence 4, Sequence 4, Sequence 4, Sequence 4, Sequence 6, Sequen
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 4,
